

Ferguson Ariva S300 model is the answer to the latest market trends and combines the optimum value for the best money. With this satellite receiver you will discover a whole new **Full HD dimension**. Compared to the other Ferguson`s models, the Ariva S300 receiver is founded on a **new central processing unit** from Novatek company (N8326SZ). We have embedded in this device all the important features of previous models, we also designed a **new user interface** and made it extremely **intuitive to use**.

Recording and playback of programs in Full HD has never been so easy and convenient. This receiver provides **picture of the highest quality** and a **crystal clear sound** for all TV programs and Radio stations. Ferguson Ariva S300 is provided – among others – with a high-speed USB port for plugging both external storage media and wireless WiFi adapter. Recording / timeshift and playing music, movies and view photos are just a few examples of the use of this versatile equipment. **Card reader for pay TV** allows access to encrypted channels. We recommend this receiver that is enriched with access to a variety of network applications.
