Treiberinstallation Ferguson Ariva TT PVR – PC (Windows)

- 1. Dateien entfalten
- 2. Receiver und PC mit "USB A-B" Kabel verbinden
- 3. Den Ferguson ARIVA in den Stand-By Modus schalten
- 4. Warten Sie bis neue Hardware entdeckt und erkannt wird. Gehen Sie in den Geräte-

Manager (Start \rightarrow Einstellungen \rightarrow Systemsteuerung \rightarrow System). Unter "USB-Controller" finden Sie ein neues Gerät "USB Massenspeichergerät":

5. Benutzen Sie die rechte Maustaste und wählen 'Treiber ändern/aktualisieren', wählen Sie bei der ersten Anfrage "Nein, diesmal nicht" an. Bei dem nächsten Schritt die Installation aus der Liste wählen.

Bei dem nächsten Schritt auf die Datei "hcpvrusb.inf" anweisen und den "HcPvrUSB" Treiber anwählen:

Falls nach dem Windows-Logo-Test nachgefragt wird, bestätigen Sie bitte mittels "Installation fortsetzen":

Nach der erfolgreichen Installation bitte "Beenden" anwählen:

Der Ferguson Ariva TT PVR HD sollte so in dem Geräte-Manager aussehen:

6. Starten Sie die Anwendung "ARIVATWIN USB"

ArivaTwin USB 1.0.2
