TORO+

silver

v-max: **75 km/h**

engine: **4000 W**

range: **up to 60 km**

battery: **li-ion**

The **Emio Toro+** is a refreshed and improved version of the Emio Toro that offers everything Emio Toro has to offer and a few improvements more to make your journey even more enjoyable. Emio Toro+ still has a powerful 4000W engine that accelerates the vehicle to a maximum of 75 km/h, which allows it to be driven even on cruising urban routes. But the „+“ is in the detail: you now have a convenient external connector to charge your vehicle's battery without having to remove it. The cockpit is now colorful and even clearer. The front lamp has changed shape and offers more powerful LED lighting. The „R“ button on the left handle allows you to conveniently reverse this rather heavy scooter – a very useful function when parking. The remote control for the alarm switch and immobilizer is now smaller and easier to put in your pocket. And the new shape of the body is better suited for cornering and driving on wet surfaces.

Meet the new and better Toro!

Get the city!

Do not pay for parking (in most cities there are no charges for parking with a motorcycle/scooter in the city center), do not stand in traffic jams, pay less for traveled routes, minimize maintenance costs (you do not have to „pour“ anything here)!

Be ECO!

on every Emio motorcycle
telephone assistant

Technical Specifications

- **Vehicle category:** L3e-A1
- **Required qualifications:** see given country regulations
- **Battery:** lithium-ion, removable
- **Battery capacity:** 72 V/40 Ah
- **Battery weight:** 18.9 kg
- **Input voltage:** 230/240 V
- **Charging time:** 5-6 hours
- **Number of charging cycles:** 800
- **Charger:** external with cooling, 72V/8A
- **Motor power:** 4000 W
- **Energy consumption:** 35 Wh/km
- **Motor type:** brushless
- **Maximum torque:** 165 Nm
- **Power transmission:** directly in the wheel
- **Maximum speed:** 75 km/h
- **Maximum range:** 50-60*km
- **Gradeability:** 25°
- **Own weight:** 102.9 kg (with battery)
- **Max load:** 150 kg
- **Length:** 1910 mm
- **Width:** 695 mm
- **Height:** 1150 mm
- **Wheelbase:** 1375 mm
- **Remote controller:** available
- **Alarm:** built-in anti-theft alarm with rear wheel lock
- **Color:** silver

* actual range depends on many factors, including temperature, mass of traveler, degree of inclination, driving dynamics etc.

ATTENTION: Due to continuous product improvement, the specifications and design of the device are subject to change without notice.

EMIO

assist

Emio Assist is an alarm kit consisting of a small electronic device and a free phone application. The sensor is installed in your vehicle and connected to the power supply. It has a permanent remote connection to the server and application via the mobile network. Thanks to it, the user receives a number of functions, e.g. a theft alarm with a map or an accident detection system informing about a possible collision. The map and navigation will also help you find your vehicle left in a parking lot or in a foreign city.

Emio Assist is an easy-to-use, tracking terminal monitoring GPS position in real time with GNSS and GSM connectivity, which is able to collect device coordinates and other useful data for sending them via the GSM network to the server.

Functions

- current vehicle position
- current vehicle speed
- access to the 4-month history of the vehicle route
- battery voltage monitoring
- information on attempted theft
- battery charge information
- information on the device's battery status
- ignition cut off

* the product is still expandable, the list of supported functions may change
