

Water Leak Sensor FS1WL

- Detects leaks & floods
- Quick reaction, discreet installation
- Allows you to react before damage gets serious

The sensor will take care of the security of the premises where are distributed water sewage installations. Its extraordinary lightness makes the installation of the sensor in the bathroom or boiler room very simple and done in seconds. The sensor consists of water detector mounted on the floor and a communication module, which is fastened on the wall.

- Working Voltage: DC3V (1*CR2032 button cell)
- Static Current: $\leq 5\mu\text{A}$
- Networking: ZigBee HA 1.2
- Wireless Networking Distance: $\leq 100\text{m}$ (open area)
- Working Environment: $-10^{\circ}\text{C} - +50^{\circ}\text{C}$
- Working Humidity: 95%RH
- Dimension: 60*30*12.5mm
