

Humidity and Temperature Sensor FS2HT

It is part of the Ferguson SmartHome 2.0 system, requires the FS2SH gateway.

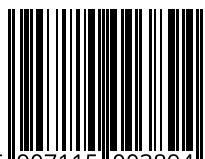

- Temperature and humidity measurement
- Graphical analysis on a smartphone
- Modern, small and stylish design

The temperature and humidity sensor provides an accurate measurement of air parameters from the place where you need such data. Thanks to the light weight and size of the sensor, as well as wireless communication using the ZigBee protocol, you can place the detector anywhere and change its position just as easily. You can view the temperature and humidity measurements in a clear, visualized way on your mobile device. Like the rest of the system, the sensor is energy-saving, which allows it to work without interruption for a very long period of time.

- Working voltage: DC3V (CR2450 battery)
- Standby current: $\leq 10\mu\text{A}$
- Web: ZigBee ad-hoc
- Wireless network range: $\leq 100\text{m}$ (open area)
- Working temperature: $-10^{\circ}\text{C} - +50^{\circ}\text{C}$
- Ambient humidity: maximum 95% RH
- Dimensions: 60 * 60 * 20.8mm
