FERGUSON

Ferguson 2.0 Smart Home

Treesat.io Friendly ™

Multipurpose Sensor FS2MP

It is part of the Ferguson SmartHome 2.0 system, requires the FS2SH gateway.

- Opening/closing sensor
- Wireless technology
- Small size, quick and easy installation

The multi-task sensor can assess the status of opening/closing doors, windows, wicket, entrance gate, garage door and send information about it to you via Smart Hub. Small size and light weight, wireless communication in the ZigBee system enable very easy installation and guarantee the mobility of the sensor. The minimum energy consumption ensures operation on one battery for up to two years.

zigbee

- Working voltage: DC3V
- Standby current: <= 5μA
- Web: ZigBee ad-hoc
- Wireless range: 100m (open area)
- Working temperature: -10℃ - +50℃
- Humidity: max 95% (non-condensing)
- Dimensions: 60 * 30 * 12.5mm
