

Motion Sensor FS2MS

It is part of the Ferguson SmartHome 2.0 system, requires the FS2SH gateway.

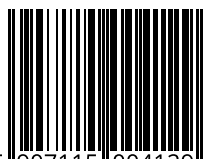

- Motion sensor
- Make your home respond to movement!
- Many years of operation on one battery

A fully mobile motion sensor that will allow you to build a security system that meets your expectations without the need to distribute expensive wired installations. The small size and weight allow the detector to be placed in the desired location in just a few dozen seconds. The sensitivity of the sensor and the ZigBee technology guarantee protection of the house against intruders, and the energy efficiency of the device ensures its reliable operation for many years on one battery.

- Working voltage: DC3V
- Detection angle: 110 degrees
- Installation height: 2.1 m
- Detection distance: 9-12m
- Working temperature: -10°C - +50°C
- Ambient humidity: <= 95% RH
- Network Mode: ZigBee
- Network range: <= 100m (open area)
- Dimensions: 65 x 65 x 28mm
