

# Intelligent Alarm Siren FS2SA

It is part of the Ferguson SmartHome 2.0 system, requires the FS2SH gateway.

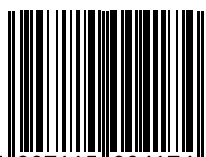

- Intelligent alarm siren
- Based on the ZigBee network
- Produces an alarm sound, combined with a warning signal
- It allows for an immediate reaction to a detected threat
- Requires Ferguson Smart Hub 2.0 to work (not included)

Thanks to an intelligent alarm siren, your home becomes even safer! From the moment an alarm siren is connected to the Ferguson Smart Home system, in addition to notifications on the phone and an alarm signal from the Ferguson Smart Hub 2.0, you will also be warned with sound and light about detected threats. You can place the siren in any room by simply plugging it into a power outlet. In the event of a power failure, the siren will still work thanks to the built-in battery power.

## zigbee

- Working voltage: AC110-240V
- Backup battery: 3.8V/700mAh
- Audible alarm intensity: 95dB (1m)
- Web: ZigBee ad-hoc
- Network range: ≤80m (open area)
- Working temperature: -10°C ~ +50°C
- Permissible humidity: ≤95% RH (non-condensing)
- Dimensions: Ø80mm x H 32mm (not including power plug)
