Programmable Wi-Fi Thermostat FS2TH
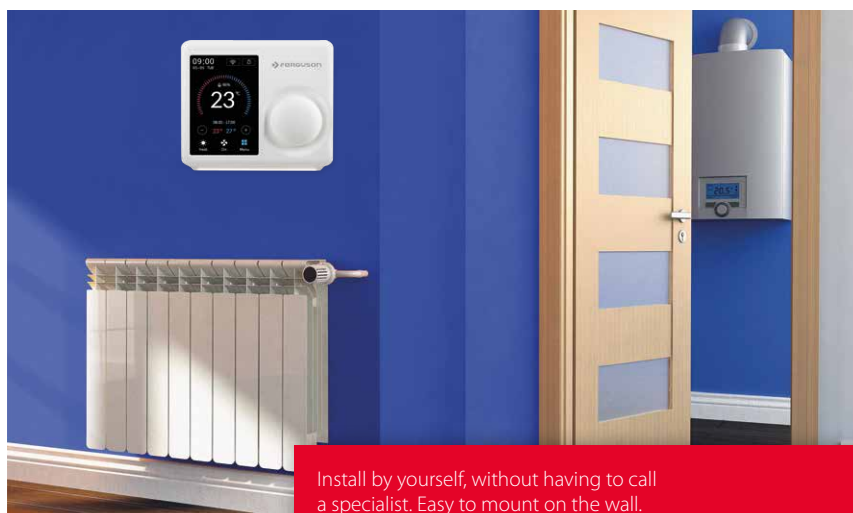

It is part of the Ferguson SmartHome 2.0 system. Can be used alone.

- **Control of the furnace, heat pump, air conditioning, ventilation**
- Intuitive and simple user interface
- Remote control of heating via the Internet Cloud
- Temperature sensor
- Color 3.5" LCD touch screen
- Programmable LED lamp
- Classic ceramic knob for easy operation
- Possibility to set a 7-day program
- High-speed Wi-Fi
- No batteries required
- Simple operation via iOS and Android apps
- Weather forecast
- One account for many users
- Power supply 12-24V DC/AC
- Easy assembly in a few minutes

Our thermostat is a smart device that allows you to, for example, receive current weather reports and even view hourly or five-day weather forecasts. You can set a daily program that optimizes the indoor temperature to suit your daily needs and lifestyle. Using the iOS and Android applications, you can create advanced programs and control the temperature in your home from anywhere at any time.
