intelligent home solutions don't have to be expensive

Smart Home touch panel 8" FS2TP1

It is part of the Ferguson Smart Home system. It can be used independently.

**A central solution for Ferguson Smart Home installations**

Introducing the FS2TP1 touch panel, a state-of-the-art device that is at the heart of Ferguson Smart Home solutions. Designed with the highest standards of technology and aesthetics in mind, the FS2TP1 combines sleek design with comprehensive functionality, allowing you to quickly and intuitively control your entire home automation system. Whether you own a home, office or public facility, this 8-inch touch panel will work perfectly as a management center, simplifying the daily operation of smart solutions and enabling full integration into the Ferguson Smart Home ecosystem.

- **Wi-Fi 802.11b/g/n and Bluetooth 5.2** - allows seamless communication with other smart home devices and enables remote control of the system.

- **USB Type-C port** - provides fast data transfer and easy integration with other accessories.

- **RS485 interface** - allows connection of external control devices, making it possible to expand the system with additional automation modules.

- **POE (IEEE802.3af) power supply and 12-24V DC power supply** - ensures installation flexibility, eliminating the need for additional power sources and affecting energy savings.

- Processor: RK3566 quad-core ARM Cortex-A55, up to 1.8GHz
- Operating system: Android 11
- RAM: 2GB
- Internal memory: 32GB
- Display: 8 inches, IPS, 1280×800 resolution
- Touchscreen: Capacitive, multipoint with wake-up function
- Wi-Fi connectivity: 802.11b/g/n
- Bluetooth connectivity: 5.2
- Interfaces: USB Type-C, RS485 (support for external devices)
- Power supply: Compatible with POE (IEEE802.3af) and DC 12-24V
- Operating temperature range: 0°C to 60°C

WI FI

Integration with Ferguson Smart Home System

A key advantage of the FS2TP1 is its full integration with the Ferguson Smart Home platform. This gives the user the ability to control many aspects of the house from one central point. The panel works perfectly with:

- **Thermostats and air conditioning systems** - allowing precise control of room temperature;

- **Alarm systems** - integrating motion detectors, opening sensors and video surveillance into one cohesive solution;

- **Automatic lighting control** - allowing you to introduce a variety of lighting scenarios that adapt to the time of day and individual preferences.
