

# Vibration Sensor FS2VS

It is part of the Ferguson SmartHome 2.0 system, requires the FS2SH gateway.

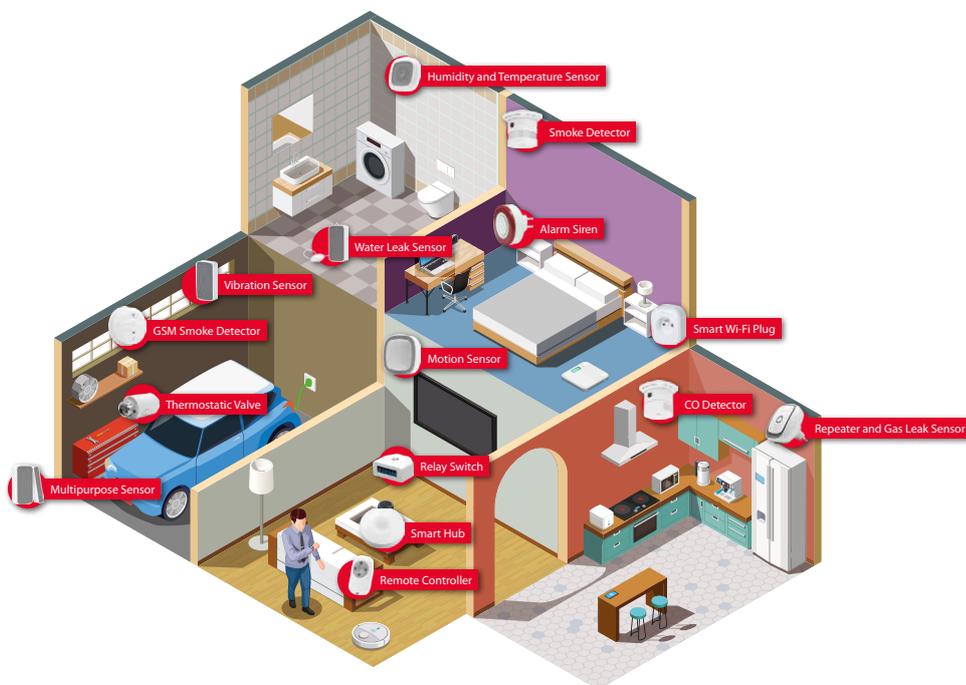

- It detects vibration of the surface to which it is attached
- Small size, discreet assembly
- React as soon as vibration is detected

The vibration sensor is the perfect solution to protect your property. Thanks to easy installation (adhesive tape), you can mount the sensor on glass or other surfaces. The sensor detects vibrations (e.g. glass breakage) and immediately sends a notification to the gate, which takes care of sending information to you and other devices that are to react (e.g. you can turn on the light automatically in this case). The vibration sensor is an excellent, non-invasive way to increase the security of your home.

- Working voltage: DC3V
- Static current:  $\leq 10\mu\text{A}$
- Alarm current:  $\leq 30\text{mA}$
- Detection distance:  $\varnothing 7\text{m}$
- Web: Zigbee ad-hoc
- Wireless network range:  $\leq 100\text{m}$  (open area)
- Anti-RF interference: 80MHz - 1GHz 10V/m
- Working environment:  $-10^{\circ}\text{C} \sim +50^{\circ}\text{C}$
- Humidity: max 95% RH
- Dimension: 60 \* 30 12.5mm
