Modern, small & stylish design

ZigBee is a language for wireless communication between devices of everyday use, which probably are already in your home or work! The elements of our system work with components of other manufacturers, and vice versa – all thanks to a modern standard: ZigBee.

Mobile Application
Control your system from your smartphone

Easy expansion of the system!

Ferguson Smart Home Security Kit can be easily extended with any other component of the system. Of course, every element of the system can be purchased separately - all of them will combine to create a network and exchange information with each other.

REALLY intelligent house!

Dedicated mobile application to handle Smart Home Security Kit

Keep up to date with the state of your home! With a dedicated mobile application you can fully monitor the state of the detectors hooked up to a central hub, you will also receive information about changes of status of the detectors, alarms and other events that may occur in your home. You can quickly turn off unwanted alarms, call the appropriate service in case of leakage of the gas or water and so on.

Manage your home easily!
