

# FBOX Firmware Update

**Please note that only the execution of the following 7 steps ensure proper operation of services after firmware update.**

1. Download and copy the zip file with software update for your FBOX model on a USB memory stick
2. Connect the USB memory to FBOX and scroll to *Settings > About Ferguson > Updates > Local update*
3. Choose from a connected memory the ZIP file with update
4. Wait for a full FBOX re-run. **Note that this operation can take as long as 10 minutes!**
5. After updating process, we recommend that you clean the device by restoring the factory settings. To do this, go to: *Settings > More > Copy and delete data > Factory Settings* and select *Reset > Erase everything*. **Note that this operation can take as long as 10 minutes!**
6. After first reboot, go to *Settings > Resolution* and choose the proper resolution for your TV and your pleasure.

**After the first start:** we recommend turning on KODI application to initialize all the libraries and the initial configuration of the Media Center.
